Ms. Marlene H. Dortch Secretary Federal Communications Commission Room TW B-204 445 12th Street, S.W. Washington, DC 20554

Re:

In the Matter of Petition of Qwest Corporation for Waiver of Depreciation Regulation Pursuant to 47 C.F.R. § 1.3 – WC Docket No. 05-259¹

Dear Ms. Dortch:

On October 20, the undersigned, along with Jerome Mueller and Marti Gude, also of Qwest, met with Tamara Preiss, Fatina Franklin, Steve Morris, Rick Robinson, and Ronald Kaufman of the Wireline Competition Bureau to discuss the above-captioned matter.

On October 24, 2005 Qwest filed an ex parte regarding that meeting.

This ex parte is being submitted to answer Staff questions regarding the October 24, 2005 ex parte and contains "Qwest Depreciation Waiver Meeting FCC Follow-Up Questions" and multiple attachments to that document. Qwest is submitting two versions of this letter and of the attached materials – a "Confidential – Not For Public Inspection" version and a "Redacted – For Public Inspection" copy. Pursuant to FCC Rules 47 C.F.R. §§ 0.457 and 0.459, Qwest requests confidential treatment of the data contained in the "Confidential – Not For Public Inspection" version of this letter and attached materials. The data is financial information which is not available for public inspection and is competitively sensitive information. A release of the data would have a substantial negative competitive impact on Qwest. Qwest provides a justification for such confidential treatment in the attached Appendix. In the redacted version of the ex parte, the attached materials have been designated as "REDACTED – FOR PUBLIC INSPECTION" and all of the confidential data has been removed. In the confidential version of

¹ See Public Notice, DA 05-2337, rel. Aug. 22, 2005.

No. of Copies rec'd O41 List ABCDE Ms. Marlene H. Dortch December 1, 2005

Page 2 of 2

the ex parte, the attached materials have been designated as "CONFIDENTIAL - NOT FOR PUBLIC INSPECTION."

Pursuant to FCC Rule 47 C.F.R. § 1.1206(b)(2), this ex parte presentation is being filed via hand delivery. An original and one copy are being submitted as well as one copy to be stamped as received and returned to the messenger who has been instructed to wait for it.

Please contact the undersigned with any questions.

ELKY

Sincerely,

Enclosures

cc: Tamara Preiss (<u>Tamara Preiss@fcc.gov</u>)

Fatina Franklin (Fatina.Franklin@fcc.gov)

Steven Morris (Steve.Morris@fcc.gov)

Ronald Kaufman (Ronald Kaufman@fcc.gov)

<u>Appendix</u>

Confidentiality Justification

Qwest requests confidential treatment of the financial information being provided, because it is confidential and proprietary financial information. That information should be afforded confidential treatment under either (or both) 47 C.F.R. § 0.457 and § 0.459.

47 C.F.R. § 0.457

The financial information designated as confidential is confidential and proprietary to Qwest as "trade secrets and commercial or financial information" under Section 0.457(d). Disclosure of such information to the public would risk revealing company-sensitive proprietary information and would have a substantial negative competitive impact on Qwest.

47 C.F.R. § 0.459

The financial information designated as confidential is also subject to protection under 47 C.F.R. § 0.459, as demonstrated below.

Information for which confidential treatment is sought

Qwest requests that the materials attached to the confidential version of this ex parte and designated as "CONFIDENTIAL – NOT FOR PUBLIC INSPECTION" be treated on a confidential basis under Exemption 4 of the Freedom of Information Act. Each page of these materials contains confidential and proprietary financial information.

Commission proceeding in which the information was submitted

The information is being submitted in WC Docket No. 05-259, In the Matter of Petition of Qwest Corporation for Waiver of Depreciation Regulation Pursuant to 47 C.F.R. § 1.3.

Degree to which the information in question is commercial or financial, or contains a trade secret or is privileged

As noted above, the financial information designated as confidential is detailed confidential commercial financial data and accounting information. Public disclosure of this information would be harmful to Qwest as it is competitively sensitive.

Degree to which the information concerns a service that is subject to competition; and manner in which disclosure of the information could result in substantial competitive harm

This financial information relates to services that are subject to competition, is not made publicly available by Qwest and would generally not be subject to routine public inspection under the Commission's rules (47 C.F.R. § 0.457(d)), demonstrating that the Commission already anticipates that release of this kind of information likely could produce competitive harm.

Measures taken by Qwest to prevent unauthorized disclosure; and availability of the information to the public and extent of any previous disclosure of the information to third parties

Qwest treats this financial information as confidential and has protected it from disclosure to parties outside the company.

Justification of the period during which Owest asserts that the material should not be available for public disclosure

Qwest cannot determine at this time any date on which this information should not be considered confidential or would become stale for purposes of the current inquiry, except that the information would be handled in conformity with general Qwest records retention policies, absent any continuing legal hold on the data.

Other information that Qwest believes may be useful in assessing whether its request for confidentiality should be granted

Under applicable Commission and court rulings, the information in question should be withheld from public disclosure. Exemption 4 of the Freedom of Information Act shields information that is (1) commercial or financial in nature; (2) obtained from a person outside government; and (3) privileged or confidential. The financial information designated as confidential satisfies this test.

QWEST DEPRECIATION WAIVER MEETING FCC FOLLOW-UP QUESTIONS

1. Asset Retirement Obligation (ARO) - FAS 143

A. Provide specific journal entries made at the time Qwest adopted FAS 143, January 1, 2003 (day before and day after view of balances).

Response:

FAS 143 Disclosure: The journal entry detail that is provided on the attached documents relates to the adoption of FAS 143 for the RBOC entity. In Qwest's previous ex parte, which was filed on October 24, 2005, it provided amounts that were summarized from a QC (Qwest Communications) 10-K for the year ended December 31, 2003 which also included the Malheur and Qwest Wireless entities. In order to tie the detail from the attached journal entries back to the previously provided table, the table has been updated to include detail for the RBOC entity since the RBOC entity is included in the QC consolidated amounts.

Summary of the FAS 143 Implementation Impact on QCII and QC:

QC	(\$M's)	RBOC Only
	Reported	(SM's) Reference
Poles		(1) Attachments 1.A.1, and 1.A.2
Aerial Cable		(1) Attachments 1.A.1, and 1.A.2
Aerial Wire		(1) Attachments 1.A.1, and 1.A.2
Reversal of Excess Removal Costs	365	
Net Asset	5	(2) Attachments 1.A.1, and 1.A.3
Retirement Obligation	-12	(3) Attachments 1.A.1, and 1.A.3
Net Asset Retirement Obligation		
Cumulative Effect	358	(4) Attachments 1.A.1, and 1.A.4
Taxes	-139	(5) Attachment 1.A.4
Net Income Impact	219	(6) Attachment 1 A.4

The attached worksheets tie back to the QC amounts listed above and contain the following information:

- 1.A.1: <u>Journal Entry</u> Actual entry recorded to recognize the implementation of FAS 143.
- 1.A.2: <u>Cost of Removal</u> Calculation of Cost of Removal amounts reversed at implementation.

- **1.A.3**: <u>Cumulative Effect</u> Summary of removal obligations for central offices and equipment rooms.
- 1.A.4: <u>Tax-Net Effect</u> Calculation of tax and net income impacts of the FAS 143 implementation.
- B. Provide historical Future Net Salvage amounts for the 3 plant accounts that did not have negative net salvage.

Response: See Attachment 1.A.2 for the negative Future Net Salvage amounts for Pole Lines, Aerial Cable (metallic) and Aerial Wire in the column titled "Future Net Salvage %."

2. Investment/Reserve Adjustments.

A. Demonstrate Qwest's methodology of allocating the investment/reserve balance to the state level.

Response: The following outlines the steps of Qwest's process of allocating the FR reserve to the states and the attachments that illustrate the steps.

		Attachment
Step 1:	Calculate theoretical reserve by state using 2005 FR depreciation parameters. Calculations were performed based on 1/1/2004 data for purpose of establishing the theoretical reserve.	2.A.1
	Theoretical Reserve Calculation (100-FNS) - ((100-ANS) * (ARL/ASL))	
	FNS = Future Net Salvage	
	ANS = Average Net Salvage ARL = Average Remaining Life ASL = Average Service Life	
Step 2:	Calculate the account theoretical reserve relationship as a percent of the total for all states.	2.A.2
	Percent Calculation Account Theoretical Reserve / Sum of all States for Same Account	
Step 3:	Allocate the 1/1/2005 FR book reserve by account based on percentages calculated in Step 2.	2.A.3
	Allocation Calculation	
	FR Account Reserve * State Account Percent from Step 2	
Examples	Colorado	2.A.4
	Idaho South	2.A.5
	Idaho North	2.A.6
	North Dakota	2.A.7

B. Demonstrate what entries Qwest would make if the waiver was granted. As of the effective date (assume 1/1/05), show the implementation entries down to state level. (All Part 32 affected accounts. Day before and day after view of balances.)

Response: The attached worksheets summarize the adjustments necessary to bring Qwest's MR records in line with Qwest's external reporting for issues relating to fixed assets and accumulated depreciation. The worksheets are displayed in ARMIS format and the adjustments are shown at the total company and state level. Colorado, Idaho and North Dakota were chosen as the state examples.

	Attachment
Before and After : Summarizes the adjustments by impacted ARMIS lines of a 1/1/05 implementation of Qwest's Depreciation waiver at a total company level.	2.B.1
Colorado Example: Summarizes the adjustments by impacted ARMIS lines of a 1/1/05 implementation of Qwest's Depreciation waiver for the state of Colorado.	2.B.2
Idaho Example: Summarizes the adjustments by impacted ARMIS lines of a 1/1/05 implementation of Qwest's Depreciation waiver for the state of Idaho.	2.B.3
North Dakota Example: Summarizes the adjustments by impacted ARMIS lines of a 1/1/05 implementation of Qwest's Depreciation waiver for the state of North Dakota.	2.B.4

Additionally, in order to align the MR records with GAAP records for fixed assets and depreciation, the following assignments and/or allocations are required:

<u>Depreciation Adjustments</u>: The adjustment to Accumulated Depreciation was determined by allocating the GAAP Accumulated Depreciation to states. The allocation is based on the state level theoretical reserve. The state theoretical reserve is developed based on GAAP depreciation parameters as of 1/1/2005. Attachments 2.B.2, 2.B.3, and 2.B.4 provide the details of the accumulated depreciation by state.

<u>Property. Plant and Equipment</u>: These adjustments were constructed in two steps. First, GAAP offbook adjustments associated to a specific state were assigned to that state. Second, the remaining offbook balance was allocated to states based on the adjusted MR balance.

Additional Considerations: This includes the impact on deferred income taxes resulting from below the line adjustment and the impact on the jurisdictional accounts resulting from changes in Qwest's MR balances. For purposes of this analysis, income taxes were assessed at 39%. When the final entry is made the general ledger system will calculate a more specific tax amount. The impact on the Jurisdictional accounts, 1500, 4370 and 7910 were calculated at an assumed 75% of the MR changes. This amount will also be mechanically generated when a final transaction is entered.

3. Asset Impairment. Provide an example of a journal entry made to record an asset impairment. Also, provide an example assuming the waiver was granted (Part 32 state example under FAS 144 guidelines).

Response: An example of a journal entry made to record an asset impairment is provided on the attached worksheets. The worksheets detail the transaction booked in the third quarter of 2000 for the impairment of LIS trunking. The attached worksheets are:

	Attachment
Original GAAP Entry: Contains the original entry booked in September of 2000 as well as a description of the impairment.	3.1
LIS Invest by State: September 2000 net LIS investment by state.	3.2
State Level Entry: Example of MR entry that would be required at January 1, 2005 to recognize this impairment at the state level.	3.3
LIS by State at 2004: The unamortized balance of the 2000 impairment at December 2004. The original offbook impairment is being amortized over the life of digital switching.	3.4

Also attached is an example Part 32 transaction assuming Qwest's waiver request is granted.

	Attachment
Waiver GAAP Entry: Example of GAAP entry to reverse the	3.5
unamortized offbook balance as of December 31, 2004.	

4. Pole Attachments. Provide an example of the depreciation rate detail within the pole attachment rate for three states (Colorado, Idaho, and North Dakota). Include projected life, remaining life, salvage, and all other depreciation parameters. Provide detail behind ROR and Tax calculations for Colorado.

Response: An example of the depreciation rate detail for the pole attachments for Colorado, Idaho and North Dakota is provided in Attachment 4.1.

Cost of Removal impacts are based on GAAP cost of removal factors as of December 31, 2002.

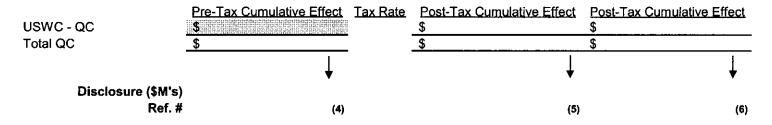

For purposes of FAS 143 implementation only accounts with significant cost of removal (i.e. greater than \$20 million) were included.

Cumulative Effect Estimate

The following SFAS 143 obligations were recognized on January 1, 2003:

FR Only (Actual Entry)

Description of LIS Trunking: LIS (Local Interconnection Service) provides dedicated trunk service between a CLEC and either a Qwest end office or local tandem. The scope of the impairment analysis was working trunks dedicated to providing LIS. The dedicated investment was predominantly switching. Impairment was determined based on the projected net incremental revenue stream (LIS revenue less associated expense) over the life of the dedicated PP&E investment.
